V. Items from Committee members

A. The discussion of the project for control environment, SAS 78, continued from the last meeting of July 19. Ms. Wascom's presentation to principals and administrators was considered to be a first step in awareness. All present discussed the need for school district employees and the public to adopt standard guidelines regarding internal controls for the use of school district property. The Committee suggested combining Core Values and State Statutes while using SAS 78 and COSO as a basis to mesh view points from both the taxpayer and educator. The mission would be the same as the District's, only from a CPA or CIA prospective. The Committee agreed that they should present an outline of their ideas to the Superintendent prior to going forward.
