

SC.912.L.16.13 – Reproductive – Example 7 Answer

Abnormalities present in the cells that line the uterus may prevent the production of offspring by directly interfering with which process?

- A. the development of the embryo**
- B. the differentiation of gametes into zygotes**
- C. the secretion of estrogen by the ovary**
- D. the production and release of egg cells**

Answer

A. the development of the embryo

The uterus is the site of implantation and development of the human embryo.
