

SC.912.L.18.1 – Macromolecules – Example 7 Answer

What will most likely happen if an appropriate enzyme is added to a chemical reaction?

- A. The reaction rate will increase.**
- B. The equilibrium of the reaction will be maintained.**
- C. The reaction rate will decrease.**
- D. The reaction will stop.**

Answer

- A. The reaction rate will increase.

Enzymes are molecules that increase the rate of reactions.
